Binura Salindra

Associate Technical Lead | Backend Engineering

binurasalindra@gmail.com | +94 71 042 4689 | Sri Lanka | linkedin.com/in/binura-salindra

SUMMARY

Associate Technical Lead with 8+ years of experience in software engineering, specialising in enterprise application development, backend engineering, and technical leadership. Experienced in guiding development teams, designing scalable software solutions, and delivering complex business applications. Strong background in Java and Spring Boot, with expertise in solution architecture, code quality, mentoring engineers, and collaborating with cross-functional teams. Focused on solving complex technical challenges, improving system reliability, and delivering high-quality software solutions that align with business objectives.

SKILLS

Leadership & Delivery
Technical Leadership, Agile/Scrum, Solution Design, Software Architecture, Code & Design Reviews, Project Coordination, Engineer Mentoring, Stakeholder Collaboration

Cloud, DevOps & Tools
AWS, Docker, Kubernetes, CI/CD Pipelines, Linux, Git, Maven, Application Deployment

Frontend & Mobile
JavaScript, React, HTML, CSS, Android Development, PHP, Bootstrap, jQuery, JSP

Backend & Security
Java, Spring Boot, Spring MVC, Microservices, Spring Security, Hibernate, Java EE, JDBC, REST API Development & Integration, WebSockets

Testing & Databases
JUnit, Mockito, Unit Testing, MySQL, MongoDB, SQL, Database Design, Data Migration

AI-Assisted Development
AI Coding Agents, AI-Assisted Software Development

PROFESSIONAL EXPERIENCE

CEYENTRA TECHNOLOGIES, Associate Technical Lead — Sep 2023 – Present | Sri Lanka

- Lead technical development and delivery of enterprise software solutions, collaborating with cross-functional teams to translate complex business requirements into scalable and maintainable applications.
- Design, develop, and maintain backend services using Java, Spring Boot, and microservices architecture, focusing on application performance, security, and reliability.
- Drive technical design discussions, conduct architecture and code reviews, and mentor junior engineers to maintain software quality and development best practices.
- Contribute to React frontend development using AI coding agents to accelerate feature implementation and support end-to-end product delivery.
- Work with AWS, Docker, Kubernetes, and CI/CD pipelines to support application deployment, maintenance, and development workflows.
- Investigate and resolve critical production issues involving payment processing, financial reconciliation, reporting, and data integrity, ensuring business continuity.
- Collaborate with stakeholders in Agile/Scrum environments to coordinate development activities, resolve technical challenges, and deliver product enhancements.

CEYENTRA TECHNOLOGIES, Senior Software Engineer — Jun 2021 – Sep 2023 | Sri Lanka

- Served in a project leadership capacity, collaborating with project managers, clients, and development teams to coordinate enterprise software development and technical delivery.
- Designed and developed backend services and enterprise web applications using Java, Spring Boot, and related technologies.
- Participated in application architecture, technical design reviews, and code reviews to improve code quality and maintainability.
- Mentored junior software engineers, providing technical guidance and supporting their professional development.
- Supported AWS cloud infrastructure configuration, application deployments, and ongoing system maintenance.

CEYENTRA TECHNOLOGIES, Software Engineer — Sep 2021 – Jun 2021 | Sri Lanka

- Developed and maintained enterprise web applications, implementing backend functionality and integrating application components.
- Contributed to software architecture and database design, ensuring maintainable and reliable application structures.
- Supported cloud infrastructure configuration, deployment activities, and application troubleshooting.

CEYENTRA TECHNOLOGIES, Associate Software Engineer Sep 2018 – Sep 2020 | Sri Lanka

- Developed Android mobile applications and web applications in collaboration with cross-functional development teams.
- Supported application feature development, debugging, testing, and maintenance throughout the software development lifecycle.
- Provided technical guidance to junior developers in Android application development.

CEYENTRA TECHNOLOGIES, Trainee Associate Software Engineer Mar 2018 – Sep 2018 | Sri Lanka

- Developed Android application features while gaining hands-on experience in software development, debugging, and collaborative engineering practices.

SELECTED PROJECTS

UniCloud360 – Student Management System, Project Lead, Backend Developer & Frontend Contributor
Technologies: Java, Spring Boot, React, MySQL, AWS

- Contributed to the development and enhancement of a cloud-based student management platform covering admissions, enrollment, payments, financial reporting, and student lifecycle management.
- Designed and implemented backend services for payment processing, reconciliation, discount management, reporting, and data migration workflows.
- Contributed to React frontend development using AI coding agents to assist with feature implementation and improve development efficiency.

Marx – FinTech Mobile Application & Internet Payment Gateway,
Project Lead, Backend Developer & Android Developer
Technologies: Java, Spring Boot, Android, iOS

- Contributed to the development of a FinTech mobile application supporting digital payments, QR transactions, and utility bill payments.
- Developed backend payment processing functionality supporting card payments through an integrated Internet Payment Gateway (IPG) for Visa, Mastercard, and American Express, and bank payments through JustPay and LankaQR.
- Led technical development activities, implemented selected Android application features, and collaborated with the development team on payment integrations and application functionality.

VisitorTags – Visitor Management System, Backend Developer
Technologies: Java, Spring Boot, React

- Developed backend functionality for a web-based visitor management system designed to streamline corporate visitor registration and management processes.

QMS – Quotation Management System, Backend Developer

- Developed backend functionality for a web-based quotation management system supporting the end-to-end quotation creation process.

EduMo – School Notification System, Backend Developer & Android Developer
Technologies: Java, Spring Boot, Android, iOS

- Developed backend and Android application features for a school communication platform supporting notifications and information sharing.

EDUCATION & PROFESSIONAL QUALIFICATION

BSc (Hons) Computer Science, University of Bolton 2023

Graduate Diploma in Software Engineering, Institute of Software Engineering 2018

BCS Level 4 Certificate in IT, BCS, The Chartered Institute for IT 2018

G.C.E Advanced Level, Rahula College Matara 2015

LANGUAGES

- English
- Sinhala
